

UNIK5000 Pressure Connector endings

Pressure connectors are not normally a big issue for customers; It is normally just a matter of the customer being able to source the mating connector easily hence the regional nature.

Euro centric Customers normally use G1/4 female

US centric customers normally use 1/4 NPT

The automotive industry like 7/16 UNF

Chinese and Eastern Europe like Metric threads M20 and M12

At high pressures (over 70 bar) we would recommend (and most customers prefer) larger stronger threads the G1/4 and 1/4 NPT are offered for these reasons.

Other Specialist applications require specialist connectors; we have included many of the common ones as standard.

In this document we have the drawings and dimensions of the pressure connector endings. For any other requirement please consult the application engineering team who can advise on whether your request is available or can be made available.

The pressure connectors are listed below.

PA - G1/4 Female	PX - 7/16-20 UNF Male Flat Short
PB - G1/4 Male	PY-3/8-24 UJNF Male
PC- G1/4 Male 60° Int Cone	PZ-M10 x 1 800 Int Cone
PD- G1/8 Male 60° Int Cone	RA-VCR Female
PE- 1/4 NPT Female	RB-G1/4 Male Flat with Snubber
PF- 1/4 NPT Male	RC-G1/4 Male Flat with Cross Bore Protection
PG- 1/8 NPT Male	RD-M12 x 1.0 740 External Cone
